Introduction

Airbnb Clone Vacation Rental Script is the ideal solution for new business owners. Simply use our Airbnb clone script to get started with your online rental marketplace business. The Buy2Rental lets the property owners to renting out their own properties or spaces to the guests and can earn from it.

User

Buy2Rental provides all of the key features to the preceding users:

- Hosts
- Guests
- Admin

Host

In our Airbnb Clone Script, The hosts are the property owner who wants to earn by listing and renting out their properties or spaces like rooms, houses, and flats.

For this, the hosts need to sign up and log in using their social media accounts or email accounts. The following are the responsibilities of a host:

Host Signup – The hosts can sign up to the website using their mail ids. Also, our Airbnb Clone Script has another option for the hosts to sign up with their social media profiles. And the registered hosts should be verified by the admin. Also, once the verified email, social media accounts like Facebook, linked in are verified successfully. The user will get the badge.

Become a Host - The host can bring their space to the marketplace to make extra income by renting it.

Responding to the Guest Booking Request - If the rooms which the guests want to book aren't available on the requested date, or if the host is failed to comply with the guest's profile, the request can be rejected, the Host has the choice to accept or deny a booked request from guests.

Accommodating the Guest - Once the payment process is finished successfully, the Host must be prepared to serve the guest according to their needs and preferences.

Guest

Guest is the travels who needs the rented property in various places around the world. The guests can also list their spaces and became the host. Similar to the host, the guest also needs to signup using their social accounts or email ids to book the properties or communicate with the hosts. Below are the activities which can be done by the guests.

Guest Signup

Users can register for Buy2Rental using their email addresses. Users have the option of signing up using their social media profiles as well.

Find the Properties

Guest can search for the property listings by entering the particular places and then picking the starting and ending date. Then, it will display the corresponding listings with all the information about the property, and as well fixed on the Map. Guests can also start looking at the listings based on the accommodations available.

Request Booking

After sending a request to the Host for the property to be booked, the guest must wait for the Host's response. The booking process is completed with payment once the Host confirms the request.

Instant Booking

If the Host selects the instant booking option, the guest can directly complete the payment and book the property.

Admin

Admin is the owner of the website and entrepreneur who wants to start a vacation rental business. They are in ultimate control of the script. A user-friendly admin panel allows the administrator to handle the host and guests.

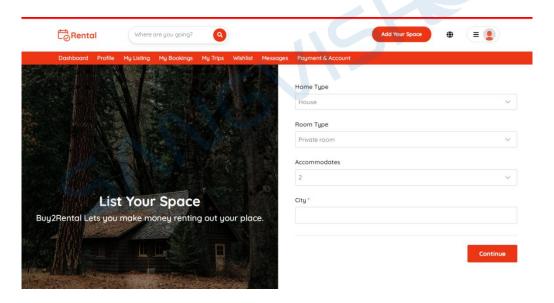

How To Become A Host?

People who want to rent out their property can become a host. And they can list their properties like house, space, apartment, rooms. In the latest update version 5.0, we have introduced the Experience the host module, where the hosts can also list the experiences like adventure sports, events and etc.

To become a host and list the property, select the Add Space option in the header and enter your property details and required information for the listing. The hosts have to complete 8 steps to list the property successfully.

Add your Space and Become A Host

To list the property the host need to choose their home type, room type, accommodates (the host has the option to decide the number of guests can accommodate), and the city.

After entering the details, clicking the continue button will take you to the next step of listing.

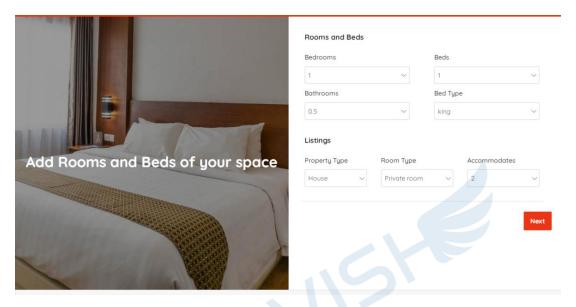

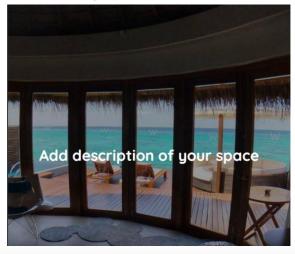

Basic Information

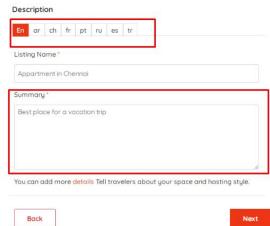

The host can add basic information about the space like the number of bedrooms, beds, bathrooms, and bed type. Also, the details from the previous page will also be shown on this page.

Description

In the description, the hosts can provide the listing name and the description of the property in multiple languages. Also by clicking "add more details", they can provide more details like about place, the space is great for, the guests can access the space, overview about the place and etc. The details can also be added in multiple languages. This will be more useful for the guests to know more about the property.

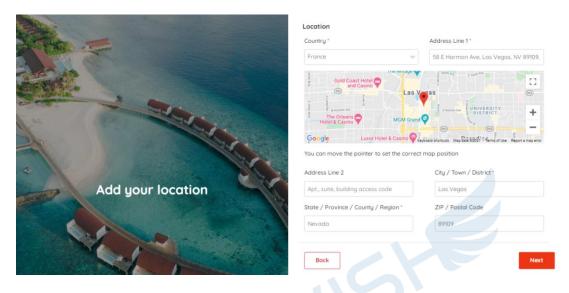

Location

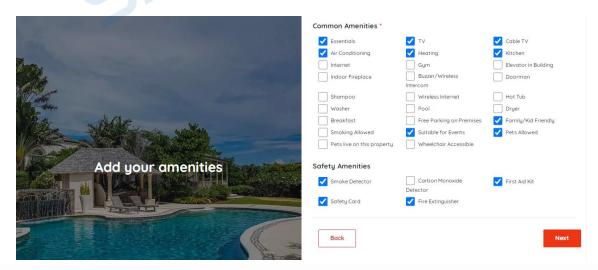

The host should mention the location of the property. They can enter the address manually, or they can also pin the exact location on the map.

Amenities

To make your listing more clear about the property the Buy2Rental lets the hosts choose the available common amenities like (TV, Internet, and other features like pets allowed, kids friendly, etc).

The hosts can also choose the available safety amenities like (Smoke Detector, first aid kit, safety card, etc).

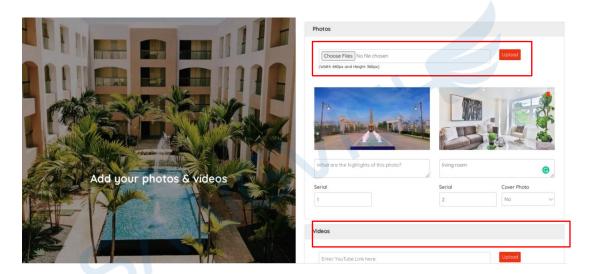

Photos

The host should upload photos of their space so that guests can know more about it. Hosts have the option of uploading multiple images of their rooms. Hosts can also delete the images they've uploaded. Also, they can add highlights about the photo. The host also can arrange the photos by providing serial numbers.

Videos

The host can include a video of their property to explore more about it. Videos attract a lot of attention and allow guests to get a better view of the location. It can be added by the host by using the YouTube URL. Adding video is an optional feature.

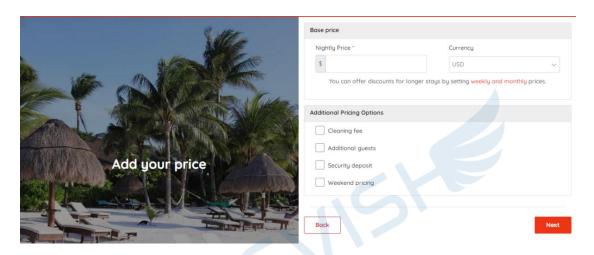

Pricing

The hosts can set the basic price for a night. Also, they can choose the currency type.

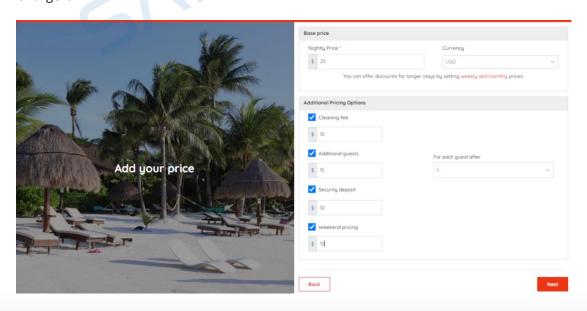

Additional Pricing Options

Also, the additional prices can be included like cleaning fee, additional guests, security deposit, and weekend pricing.

Length of Stay Discount

The Host can also offer a discount for the longer stays by setting weekly and monthly chargers.

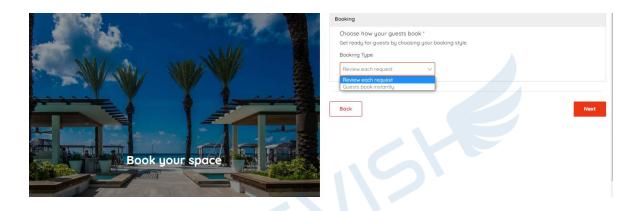

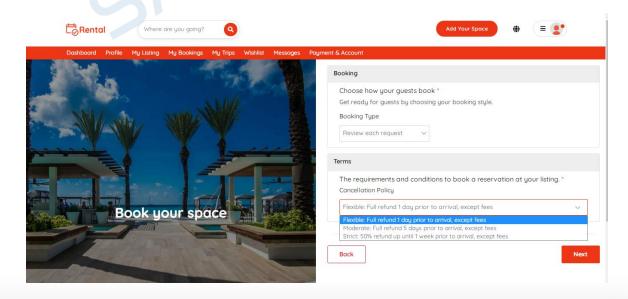

Booking

When creating a listing, the host has two options to book for the property. After completing a listing, the host can choose between "guests book instantly " and "review each booking" as a booking option. If the host selects "guests book instantly", the guest can book the property right away without having to put it on hold for a response from the host. If the host chooses the review each booking when listing, the guest may make such a request and wait for the host to accept or deny the request.

Terms

The host can choose from three cancellation policies that includes Flexible, Moderate and Strong when adding the listing.

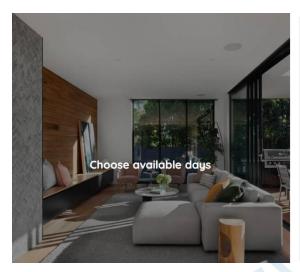

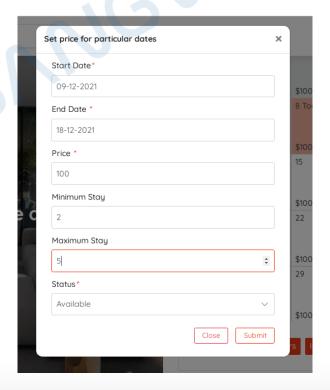

Calendar

Hosts can use the calendar to select the dates as available or not available, as well as the host can edit the pricing in the calendar. The host can rewrite dates manually or by choosing and trying to drag dates on the calendar, as well as set/change prices. Import calendar, sync with other calendars, and export calendar are all available in Host. Also, the hosts can include minimum and maximum stay requirements.

Listing Approval

The listing is sent to the admin for approval after the host has listed their space. The admin verifies and approves the listing. After that, the listing can be found in the "My Listings" section. Also, the host can the list/unlist option for unlisting their property.

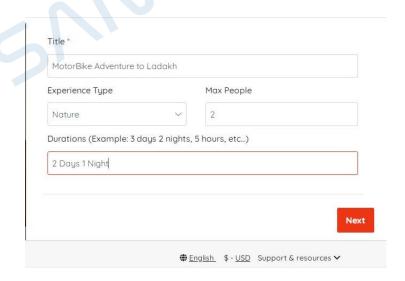

Add your Experience

To start listing the experience, In the home page the host needs to choose the Add your experience option. After choosing the city, click continue to proceed with the next step.

Basic Information

In the next step, provide information like Title, Experience type, max people and Duration.

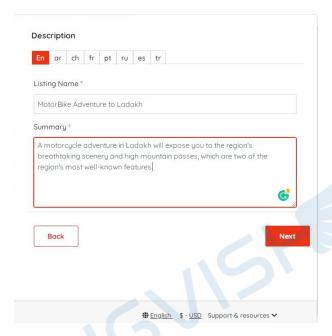

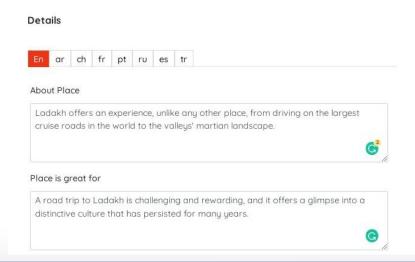

Description

In the description, the hosts can provide the Listing name and the description of the experience in multiple languages.

Also in the next step, they can provide more details like about the place, the space is great for, the guests can access the space, overview about the place and etc. The details can also be added in multiple languages. Providing this information will be more useful for the guests to know more about the experience.

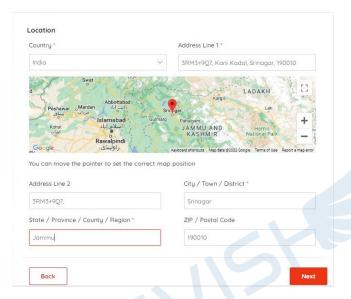

Location

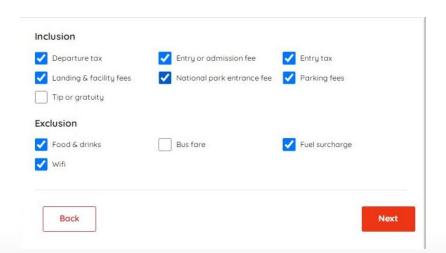

Where the experience will take place should be provided by the host. They can manually input the address or pin the exact place on the map.

Inclusion & Exclusion

To make your experience listing more clear about things included and excluded on the experience the Buy2Rental lets the hosts choose the inclusions like departure tax, entry tax, parking fees and etc..

And it also has the exclusions like foods and drinks, bus fair, fuel surcharge and wifi.

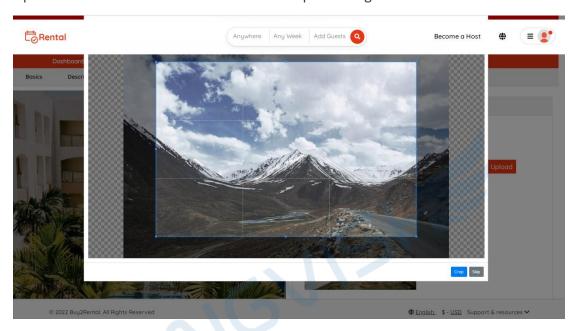

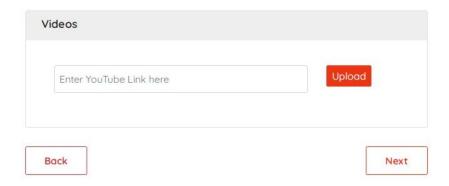

Photos

So that visitors can learn more about the experience, the host should post pictures of it. Multiple photos can be uploaded by the hosts. The images that the hosts have posted can also be deleted. They can also add highlights to the image. By giving serial numbers of the photos, the host can also arrange them. And the image cropping option also included so that the host can crop the image for the best view.

Videos

To learn more about it, the host can provide a video of their experience. Videos grab a lot of attention and provide visitors a better understanding of the place. The host can include it simply using the YouTube URL. It's an optional feature to include video.

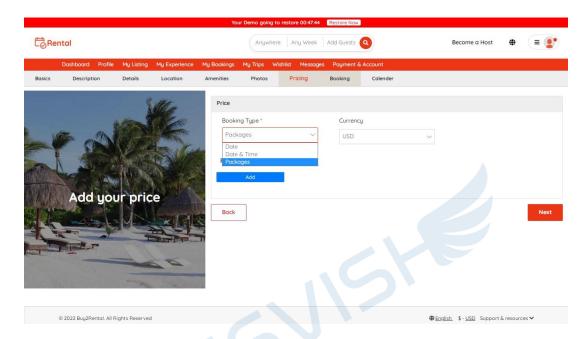

Pricing

The hosts can set the price in three ways such as Package, Date and Time and Date

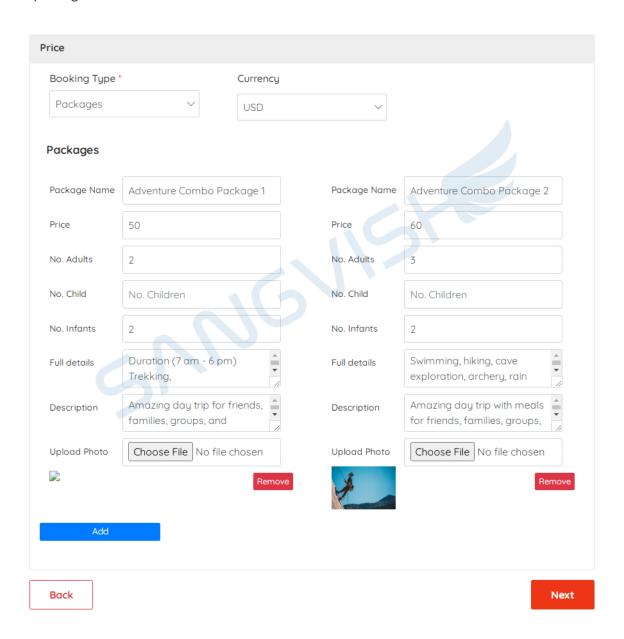

Package

In the package pricing the hosts can list more than one package and its prices, number of persons and the others details, description and image included in the package.

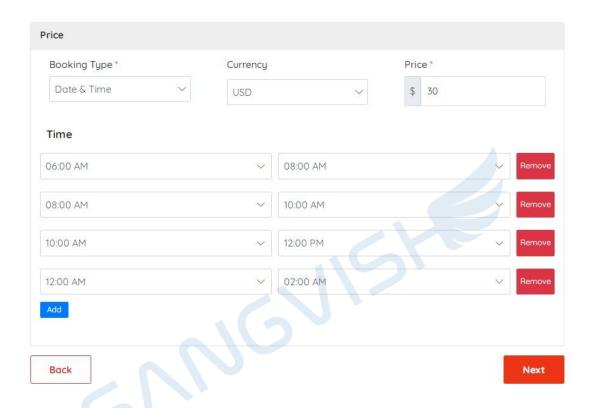

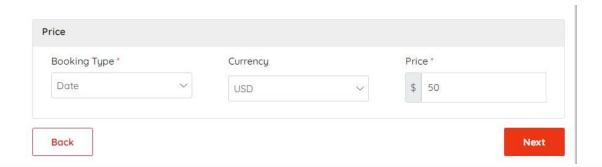

Date and Time

When listing the experience for some particular time the host can use this pricing. In this pricing method the host can select the date, start time and end time.

Date

This can be used when listing the experience for some particular date and set the price.

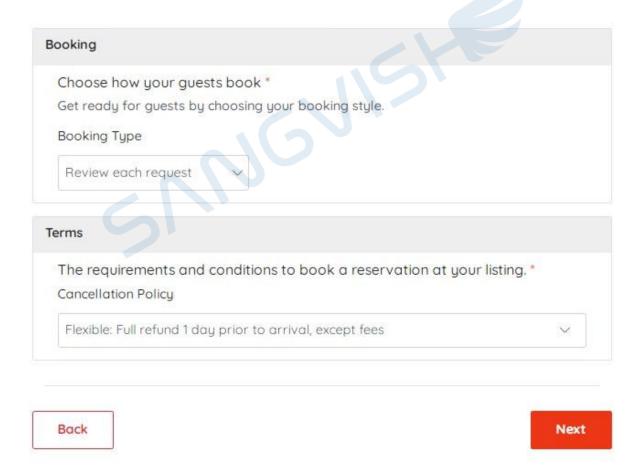

Booking

Similar to listing the property, the host has two options for booking an experience. The host can select "guests book instantly" or "review each booking" as a booking option when listing. The guest can reserve the property right immediately without waiting for a response from the host if the host chooses "guests book instantly." If the host choose "review each booking" when listing, the guest may make such a request and wait for the host to accept or decline it.

Terms

The host can choose from three cancellation policies that includes Flexible, Moderate and Strong when adding the experience listing.

Calendar

The calendar can be used by hosts to mark certain dates as available or unavailable. Although the host can change the prices on the calendar, this might not be applicable for package prices. The host can modify prices and manually rewrite dates by selecting and dragging them on the calendar. In Host, you can import calendars, sync them with other calendars, and export calendars.
